

Xtra 360 Release Notes

Release Date: May 31, 2026

Firmware Version: V01.00.14.08

Xtra 360 App for iOS: V1.2.8

Xtra 360 App for Android: V1.2.8

This Update Includes

1. New Features

- Added Night View Mode in Single-Lens Mode.
- Added Twist to Shoot. When the camera is powered on, twist the selfie stick twice to start shooting or recording. To enable this feature, swipe down from the top of the shooting screen to open Control Center, swipe left, and tap the Twist to Shoot icon.
- Added Single-Lens Live Stream. After connecting the camera to the latest version of the Xtra 360 App, enter the camera screen, swipe to Live at the bottom, and complete the setup to start streaming from the app.
- Added Filters in Panorama Photo mode, including 6 film-style presets. Tap the settings icon on the right and select filter to apply.
- Added Adaptive Tone in Panorama Video mode. Tap the adjustment icon on the right, then tap Adaptive Tone to enable it.

2. Image Quality Improvements

- Improved image quality in high-contrast scenes, especially for backlit portraits.
- Improved anti-flicker performance effectively eliminates light flickering from street lamps during night shooting.
- Improved low-light performance.
- Enhanced image performance for snowy scenes.

3. Editor Updates

- Panorama video editing now supports noise reduction. In the Xtra 360 App editor, tap the resolution option next to Export in the upper right, then enable Noise Reduction.
- The panoramic video editing tracking function features an auto-recommended tracking target. On the editing page of the Xtra 360 App, tap Smart Tracking at the bottom-left corner; the system will automatically frame the optimal tracking subject in the current frame by default.
- Panorama video editing now supports Dewarping. In the editor, tap Dewrap on the left to reduce distortion.
- Video editing now supports importing custom filters. In the editor, tap Filter at the bottom, then tap Lut.
- Flat video editing now supports Mirror, Aspect Rotate and Rotate. In the editor, swipe left along the bottom toolbar and tap Mirror, Aspect Rotate or Rotate.

Notes:

If you encounter issues during the update, please try the following:

1. Restart the camera and the Xtra App.
2. Turn Wi-Fi and Bluetooth off and back on.
3. Reconnect to the Xtra App and try the update again.
